(54) DOUBLE-ROOM MEDICAL CONTAINER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a double-room medical container which can be easily manufactured, which can be securely sealed and separated without breaking the sealed part with a pressure to be applied in the manufacturing process, transportation process or in storing, and whose rooms can be made to communicate with each other by a simple operation when used.

SOLUTION: This is a flexible container 1 with plural sections, and a medicine is stored and sealed in each section. Each section is made to communicate with each other with a communicating member 4 with a sealed part whose sealing is easily broken by pressure from outside.
